ESTIMATED GROSS CASH INCOME TO OHIO FARMERS FROM THE SALE OF AGRICULTURAL
PRODUCTS AND FROM AGRICULTURAL CONSERVATION AND SUGAR BEET
PROGRAM PAYMENTS, BY COUNTIES - 1945 & 1946

Explanations

This bulletin presents the estimated gross cash income to Ohio farmers from the sale of Agricultural Commodities and from Agricultural Conservation and Sugar Beet Program Payments for 1945 and 1946. Similar estimates have been made for 1927 and for each year since 1929. The results have been published in Mimeograph Bulletins No. 22, No. 27, No. 48, No. 60, No. 93, No. 114, No. 121, No. 130, No. 155, No. 171, and No. 190 of the Department of Rural Economics, Ohio State University and the Ohio Agricultural Experiment Station.

In this report all income figures were calculated for the calendar year. In studies previous to 1939 crop income was calculated on a crop year basis; that is, the income from a crop was assigned to the year when grown even if part or all of it was sold the following year, while livestock income was based on the calendar year. Certain changes of methods of calculation become necessary from year to year due to changes in basic sources of information. Because of this fact, figures for some items are not completely comparable from year to year. Nevertheless, a fair picture of the sources of agricultural income and their relative importance is given by this study.

In this study, gross cash income is used to denote the actual total income to farms in a county from the sale of agricultural commodities. There are a few exceptions, interfarm sales of livestock not being included in the study. The data herein do not necessarily indicate the relative importance of the various enterprises, but rather their importance as sources of income through sales.

The data used as a basis for this study was secured from the Bureau of Agricultural Economics, United States Department of Agriculture; Census publications; information compiled by the Department of Rural Economics, Ohio State University; and the best judgment and opinions of experts in the several agricultural enterprises.

The total income as shown in this study varies slightly from that published by the United States Department of Agriculture because of the omission of income from horses, mules, mohair, honey, beeswax and bees in 1945 and 1946 and peppermint in 1945. The Government payments used in this study are the Agricultural Conservation and Sugar Beet Program Payments only. The payments are for the program years, which correspond to the calendar years, 1944 and 1945, of which the major part of the payments was made the year following, that is the 1944 payments were made in 1945 and the 1945 payments were made in 1946. Dairy, hog, beef cattle and sheep and lamb subsidies have not been included since they were not available by counties. The total Government payments published by the Bureau of Agricultural Economics for 1945 were \$29,966,000, of which \$9,279,900 were Agricultural Conservation and Sugar Beet Program Payments. The total Government payments in 1946 were \$28,057,000 of which \$8,569,700 were Agricultural Conservation and Sugar Beet Program Payments.

As pointed out on the previous page the data given here do not indicate the total value of agricultural production. It is only the amount received for that portion of the production which was sold. The value of that portion consumed on the farm as feed, seed or for home use, or income from outside work, or outside investments has not been included.

In this study, with the exception of Table IX, income from the Dairy Enterprise includes the income from the sale of dairy products, veal calves and cull dairy cows while the Cattle Enterprise includes the income from the sale of cattle for meat purposes except veal calves and cull dairy cows. In Table IX the gross cash income from the sale of cattle and calves includes the income from cull dairy cows, veal calves and the income from the Cattle Enterprise as defined above. It should be noted that the cost of feeder cattle purchased has not been deducted from cattle sales. The Poultry Enterprise includes the income from eggs, chickens, turkeys and other poultry. The Sheep Enterprise includes income from sheep, lambs and wool, and as in the case of cattle deduction for the cost of feeder sheep purchased was not made from sales. The enterprise entitled Truck includes canning crops and other vegetables grown for sale except greenhouse and potatoes which were estimated separately.

As a great variation exists in the size of the counties, the total gross cash income is unsatisfactory as a means of comparing two counties. For this reason gross cash income per farm and per acre was calculated. The total gross income was divided by the number of acres of all land in farms and by the number of farms as given in the 1945 census to give the value per farm and per acre shown in Table VI and Table VIII. An exception was made in the case of Pickaway County. The Census lists 324,108 acres as "all land in farms", while the total land area in the county is listed as 324,480 acres. In figuring the income per acres a figure of 304,108 acres for "all land in farms" was used as this appears more reasonable with allowance made for known acreages in incorporated villages and the percentage increase of the 1945 over the 1940 census figures for "all land in farms" in the surrounding counties. It should be noted that the low income per acre in some counties was in part due to the fact that the acreage designated as "all land in farms" includes considerable acres of land not actually under cultivation and some not even used for pasture. The Census "number of farms" includes tracts of 3 acres or more, and if the value of agricultural products in 1944 was at least \$250.

Acknowledgments

The authors are indebted to Glenn S. Ray and Eldon E. Houghton, of the Bureau of Agricultural Economics, U. S. Department of Agriculture, for their willing cooperation in supplying the major part of the data and for their suggestions of procedures used in this study. We are also grateful to the Ohio Production and Marketing Administration for the data on Government payments. Comments and suggestions from R. H. Baker and R. C. Headington have also been of invaluable aid in the preparation of the study.

TABLE I. Gross Cash Income From the Sale of Agricultural Products From Ohio Farms, by Enterprises, and the Per Cent Each Was of the Total, Calendar Year, 1945

Enterprise	Income from Sales	Per Cent of the Total
Dairy	\$183,019,600	25.04
Hogs	145,235,000	19.87
Poultry	116,359,000	15.92
Wheat	63,523,000	8.69
Cattle	49,034,400	6.71
Soybeans	36,448,000	4.99
Truck	29,387,000	4.02
Corn	22,428,000	3.07
Sheep	14,376,000	1.97
Fruit	11,154,000	1.53
Tobacco	9,856,000	1.35
Hay	8,035,000	1.10
Potatoes	7,949,000	1.09
Oats	5,608,000	.77
Hay-crop Seeds	3,036,000	.42
Sugar Beets	2,358,000	.32
Other ^{1/}	22,970,000	3.14
Total ^{2/}	\$730,776,000	100.00

^{1/} Greenhouse, nursery and forest products comprise a large per cent of this figure.

^{2/} Government Payments of \$29,966,000, of which \$9,297,900 were Agricultural Conservation and Sugar Beet Program Payments are not included in this total.

TABLE II. Gross Cash Income From the Sale of Agricultural Products from Ohio Farms, by Enterprises, and the Per Cent Each was of the Total, Calendar Year, 1946

Enterprise	Income from Sales	Per Cent of the Total
Dairy	\$224,867,000	26.37
Hogs	189,049,000	22.17
Poultry	113,014,000	13.25
Wheat	70,144,000	8.22
Cattle	57,487,000	6.74
Corn	37,825,000	4.43
Soybeans	36,905,000	4.33
Truck	26,609,000	3.12
Sheep	15,991,000	1.88
Fruit	15,589,000	1.83
Oats	10,155,000	1.19
Potatoes	8,038,000	.94
Tobacco	7,675,000	.90
Hay	6,853,000	.80
Hay-crop Seeds	3,289,000	.39
Sugar Beets	2,876,000	.34
Other ^{1/}	<u>26,396,000</u>	<u>3.10</u>
Total ^{2/}	\$852,762,000	100.00

^{1/} Greenhouse, nursery and forest products comprise a large per cent of this figure.

^{2/} Government Payments of \$28,057,000, of which \$8,569,700 were Agricultural Conservation and Sugar Beet Program Payments are not included in this total.
